

This Month's News

Baby Chicks: Our group is growing in numbers! We are getting another new friend on April 6; her name is Autumn and she is 6 months old. We're looking forward to the coming warmer weather and more walks outside. We are also very excited that Ms. Tammy is in the process of joining us once again!

Love- Ms. Jeri and Ms. Tammy

Penguins: We welcomed Kiaya to our group this past month! Our group is doing very well on our newer side of KTK. We are all getting our nap and snack routines down pat. We have been able to go on a bunch of walks this past month and expect to go on even more this month. Keep bringing weather appropriate clothes.

Love- Ms. Sandy and Ms. Linda

Parrots: The Parrots are very excited about the nice spring weather as we are getting outside much more often now, we are also happy to welcome Ben T. and Maggie H. to our room. With that we say goodbye to Sammy and Nash as they move on to the Peacocks. If you haven't done so already, feel free to bring snow pants and boots home. We hope we won't need them anymore! Happy Easter!

Love- Mr. Charley

Peacocks: We have had an exciting month in the Peacocks! We welcomed Sammy from the Parrots and will soon be welcoming Nash and saying goodbye to Nevaeh as she will move to the Owls. We are also working very hard at following directions and using good listening ears. We are looking forward to the spring and Easter season, as we will be doing an Easter egg hunt on Thursday, April 9th throughout the building. Also, please remember that we do go outside and with the wet weather it is nice to have an extra set of clothes! We look forward to be able to spend lots more time outside!!

Love- Ms. Caren

Owls: The Owls will be studying weather, Easter, spring, plants and Earth Day this month. We will be focusing on the changing weather this month every morning at circle time. We will also be science oriented when we learn the basics of the water table, look at the buds on the trees, and even touch base with photosynthesis (in a very kid friendly way, of course☺). This is Miss. Laura's favorite time of year and the Owl's will most likely be found on the playground or the nearby neighborhood being little scientists!

Love- Miss. Laura
