

Swimming Ability Questionnaire- Summer 2020

Childs Name: _____

Age: _____

Each summer, children take a swim test with a certified lifeguard at Crowdaddy Cove. During this swim test, each child will need to swim the short length of the pool without touching the bottom. The lifeguard will assess their swimming skills, and pass them if he/she feels confident they can swim in the deep pool safely. We then use this, along with individual pool rules, to guide us throughout the summer.

This year, we are also having parents complete a questionnaire that will provide us with more detail on each individual kids swimming abilities and experience.

Please check which applies:

My child can:

- Swim in water above head
- Swim in water above head with Life Jacket
- Cannot swim in water above head
- Unknown

Please explain your child’s comfort level with water/swimming/water slides:

Please list any concerns you have with your child’s swimming ability (they get very excited in water, they are nervous in water, they think their ability is higher/lower than it is.)

Anything else you would like us to know about your child when it comes to swimming:

***If any of these things change throughout the summer (they pass a level in swim class, gain more confidence) please email Cassie Koch at ckoch@koala-t-kare.com**
